Education

B.Tech In Information and Communication Technology

Nov 2020 – Present

PDEU, Gandhinager

GPA: 9.72

Coursework: ML, DL, AI, RL, NLP,VLSI,ACD,DLD and HLD,CCN, Quantum Computing, Theory Of Computation, Data Mining, Data Science, DBMS, SQL, etc.

Science Stream

June 2018 – March 2020

Devasya International Public School, Ahmedabad

Percentile: 96%

Coursework: Maths, Physics, Chemistry, Computer

Technical Skills

Programming: Python (Pandas, PyTorch, NumPy, Scikit-learn, keras, TensorFlow. etc.),Matlab, C,go, Java , SQL.

Miscellaneous: Microsoft Office, Android studio , JetBrains(IntelliJ IDEA, PyCharm) ,CADENCE ,Logisim , Proteus ,Atmel studio, Git.

Soft Skills:Time Management, Teamwork, Problem-solving, Research-oriented Documentation.

Experience

Amazon Summer School

SEP 2023 – OCT 2023

Learning Program

Remote

- Learned Machine Learning (ML) topics including Supervised Learning, Deep Neural Networks, Dimensionality Reduction, Unsupervised Learning, Probabilistic Graphical Models, Sequential Learning, Causal Inference and Reinforcement Learning.

IIT RAM

May 2023 – July 2023

Summer Research Intern

Ahmedabad

- Developed a DL system utilizing DEIT to estimate livestock age from teeth images.
- Analyzed cattle teeth data across various ages, achieving real-time classification with enhanced accuracy.
- Conducted experiments to evaluate the effectiveness of the approach and measured outcomes.

EInfochips

May 2023 – June 2023

Technology trends Intern

Ahmedabad

- Worked on cutting-edge technologies.
- Explored more about python and its application on different fields.
- Discovered how ChatGPT works and learned its integration into diverse use cases.

PDEU

Jan 2023 – May 2023

Student Research Intern

Gandhinagar

- Used Roboflow to mark and identify various vehicles in images.
- Worked with different versions of YOLO to train models for count number of vehicle in image.
- Researched a system to adjust traffic lights at intersections based on the traffic flow.

Projects

PalmIoT SecureLink | Raspberry Pi4, Python...

Aug – NOV 2023

- Developed Palm recognition system for security Purpose.
- Implemented Different feature extraction technique like HOG and LBP.
- Applied different convolution neural network and perform ensemble learning method.
- Implemented system in hardware using Raspberry pi , Ipweb Cam etc.

Click-bait News detection extension | Python ,LSTM ,React... | [Git](#) | [Demo](#)

Jan – May 2023

- Trained a model with LSTM networks and Stanford GloVe embeddings to spot clickbait content.
- Demonstrated proficiency in deep learning, natural language processing (NLP), and technology.
- Built a Chrome extension to alert users about misleading articles.
- Utilized this expertise to combat clickbait on the web.

Entrify: StudentSafeCampus | *Android studio, Java, Firebase...* | [Git](#)

Dec – June 2023

- Developed "Entrify," a safety-focused Android JAVA application for student security.
- Implemented multiple pickup options, including QR code generation, email authentication, and relative approval.
- Ensured data security by integrating the app with Firebase for secure data transfer and storage.
- Contributed to creating a safer environment for students while providing peace of mind to parents through technology.

TO-DO MANAGER | *React JS, TypeScript, HTML, Figma Design (for UI/UX design)...* | [Git](#) | [Demo](#) **Sep – Oct 2023**

- Enable users to add new tasks with a description and due date.
- Allow tasks to be marked as 'completed'.
- Provided an option to delete tasks.
- Implemented the ability to view tasks, either all at once or filtered by 'completed' or 'pending'.

Publication

Density Based Automatic Traffic Control System Using ML | IEEE

July 2023

- Researched and developed an automatic traffic control system utilizing machine learning (YOLO) to detect and manage traffic density effectively.
- Demonstrated the potential of this technology in enhancing traffic management, reducing congestion, and improving road safety through real-time density analysis.

Certifications

NPTEL: Constrained and Unconstrained Optimization.(IIT-KGP)

ISRO : machine Learning to Deep Learning:A journey for remote sensing data classification
